English, Turkish

Featured Projects

[Java License Manager](#)

JavaLicense offers server-based licensing for Java apps, eliminating traditional keys. Secure, efficient, and key-free licensing solution.

[Farmer v6](#)

Introducing Farmer v6: Your virtual assistant for item collection on your island. Buy with in-game currency, add users, manage permissions, and track stock easily. (Minecraft Plugin)

[Discord Webhook](#)

Discord-Webhook is a library and toolkit developed in Java, aimed at developers looking to create various automations and integrations on Discord. The purpose of this project is to facilitate easy communication with your Discord servers and channels, allowing you to transmit data such as messages, updates, and information through the Discord Webhook API.

[AutoWpMsg](#)

AutoWpMsg is a Java-based automation tool that reads Excel data and sends WhatsApp messages based on specified criteria. This project provides the capability to send scheduled messages and assists in managing WhatsApp messages programmatically.

[My Portfolio](#)

My all other projects shared and explained on my own website.

Hobbies

Watching Netflix, Playing computer games, Open-Source programmin, Exploring new songs and DIY repairs
